

Job Vacancy: Lead Software Developer

Location: Remote

Salary: £50,000 - £60,000

Hours: 40 hours per week

Map of Ag is an exciting technology company focused on developing solutions for the agri-food sector. Part of their work involves the development of custom software and platforms, to support businesses in becoming more sustainable, productive, and profitable.

Map of Ag are looking to recruit a new Lead Software Developer to support primarily with its custom software development work. The successful candidate will be responsible for managing delivery and development of a major customer contract, working closely with the customer, as well as providing technical leadership to other developers working on the project.

Job Role

The day-to-day activities for this role will include:

- Able to work independently and unsupervised.
- Working with other developers to provide code reviews, support and be their point of contact for technical questions.
- Upholding team and organisation development practices within the wider team.
- Contribute to continuous improvement of team delivery and development processes.
- Work with the rest of the team to pro-actively monitor development progress and ensure that issues and roadblocks are resolved as soon as possible.
- Break down, plan and manage software project delivery.
- Responsible for overseeing one (or more) projects within the organisation across the full stack.
- Responsible for facilitating technical discussions within the team, and with customers as necessary.

Additional Activities

As well as the above day-to-day activities, this role would also likely include:

- Coaching and mentoring other developers with professional development.
- Responsible for investigating and experimenting with new technologies, and providing insights on such to the team and the wider organisation.
- Be curious and ask questions about process, tooling, technologies in use within the team.
- Providing assistance in the Sales process where technical support is required.

Capabilities Required

- Knowledge
 - Strong technical software development skills in PHP & TypeScript/JavaScript (Laravel & Angular) is essential.
 - Experience with web services, serverless architecture and asynchronous data processing is highly valued.
 - Good interpersonal communication skills, including the ability to speak with customers and colleagues, and to write clear and compelling documentation.
 - We're looking for developers with an understanding of good practices in modern application design, well-structured development practices, and agile team experience.
 - You will need to be comfortable working across the full stack from frontend SPAs to backend APIs and data storage.
- Education/Qualifications:
 - Two or more years of industry experience is required, but a suitable degree in Computer Science, Information Technology, or Agriculture is advantageous.
- Competencies
 - Self motivated.
 - Results driven.
 - Problem solving.
 - Planning & organising.
 - Communication.
 - Interpersonal skills.

Location

This is a remote role, however frequent visits to Map of Ag's Penrith office would be highly advantageous if practical, to meet with other team members.
