

Map of Ag: Job Vacancy

Role: AgriData Assistant & Information Security Risk Coordinator (with great opportunity for career progression)

Location: Penrith, Cumbria

Salary: £29,000 - £34,000 pro rata dependant on experience

Hours: 40 hours per week - part-time would be considered for the right candidate

Map of Ag is seeking a dynamic and motivated Project Manager to join our team in Penrith, Cumbria. This is your opportunity to deliver impactful projects that make a real difference to sustainable agriculture across the UK.

If you're passionate about the future of farming and food, and want to work for an innovative agricultural data connectivity and insights business, we'd love to hear from you.

Why Join Map of Ag?

Meaningful Impact: Play a central role in building resilient, sustainable supply chains and supporting the food industry's growing demand for transparency and innovation.

Collaborative Culture: Work closely with talented colleagues across departments and engage directly with farmers and industry leaders.

Exciting Projects: From measuring greenhouse gas emissions across six supply chains for a major supermarket to delivering insights on animal health and welfare for leading milk processors, you'll be at the forefront of industry change.

Career Progression: This position offers excellent opportunities for growth within a fast-expanding company committed to sustainability and innovation.

About the Role

Are you passionate about agriculture, data, and helping organisations keep information secure and well-managed? We're looking for a motivated and detail driven AgriData Assistant & Information Security Risk Coordinator to join our growing team.

This is a unique hybrid role combining hands on agricultural data administration with information security and risk coordination. You'll support industry leading sustainability and animal welfare projects while helping to run and improve our Information Security Management System (ISMS), including ISO 27001 activities.

If you enjoy variety, teamwork, problem solving and working across departments, this could be the perfect next step in your career.

What You'll Be Doing

AgriData Administration

- Supporting delivery of high impact agricultural data projects for major retailers and processors
- Checking and validating data in our online farm database
- Completing occasional data entry to ensure accuracy and completeness
- Liaising with farmers and internal teams to resolve queries and gather information

- Communicating with supply chain partners via phone and email
- Contributing to team meetings, tracking tasks, and ensuring deadlines are met

Information Security & Risk Coordination

- Supporting the operation and continuous improvement of the ISMS in line with ISO/IEC 27001
- Helping prepare materials and coordinate internal/external audits
- Advising on day today GDPR compliance and acting as a contact point for data protection queries
- Drafting, reviewing and circulating information security policies and procedures
- Conducting routine compliance checks and monitoring corrective actions
- Assisting with security risk assessments, DPIAs and improvement plans
- Promoting information security awareness, training, and best practice across the organisation
- Supporting incident management, documentation and reporting
- Coordinating evidence gathering for certification and audit readiness
- Collaborating across global teams, including occasional evening work to support other time zones

What We're Looking for

Essential Skills & Attributes

- Strong attention to detail and commitment to high quality work
- Excellent communication skills – confident speaking with farmers, colleagues and stakeholders
- Ability to work independently while contributing effectively to team projects
- Good organisational skills with the ability to manage multiple tasks simultaneously
- Positive, adaptable and resilient attitude
- Strong written and verbal English

Desirable (Training Provided Where Needed)

- Knowledge of the agriculture sector
- Experience with ISMS operations and Microsoft applications
- Familiarity with ISO 27001, SOC2, Cyber Essentials or similar standards
- Ability to build and improve systems and processes for quality assurance and compliance

Why Join Us?

- Play a meaningful role in sustainable agriculture, data transparency and supply chain improvement
- Develop specialist skills in information security and risk management
- Work with a friendly, collaborative team across multiple countries
- Training and professional development opportunities

Package

We offer a competitive salary, with 25 days paid annual leave in addition to public holidays and enrolment onto the company workplace pension scheme.
