

Job Vacancy

Role: Project Analyst

Location: Penrith, Cumbria

Salary: £28,500 - £34,000

Hours: 40 per week

Map of Ag is a global leader in farm data insights, supporting the food supply chain to collect data, unlock value and strengthen decision-making. From animal health & welfare programmes to cropping regenerative agricultural schemes, Map of Ag work at the heart of the industry to build a more resilient future for all.

Find out more about our work in the below client case studies:

[Clawson Cheese - How smart data is helping blue cheese go green](#)

[Morrisons - How carbon auditing is improving beef performance](#)

[Weetabix - Wheat growers cut on farm emissions with lower nitrogen approach](#)

We're looking for a motivated **Project Analyst** to join our team in Penrith. This is a vital role to help connect our Client and Product teams within Map of Ag, supporting the delivery of impactful projects across a wide range of agricultural supply chains.

Key Responsibilities:

As part of the role, you will be:

- Shaping project work plans that keep multiple programmes moving forward, from kick-off to delivery
- Working closely with Client Delivery Teams to capture, clarify and document key project requirements, ensuring they're translated accurately into specifications
- Designing clear, practical specifications for surveys, reports and project outputs that set teams up for success
- Defining the data requirements, sources and fields behind our surveys, reports and monthly datasets
- Running quality checks and testing to ensure surveys and reports are fit for purpose and perform as intended
- Spotting and fixing simple survey errors, and supporting the build of simple surveys within our systems
- Acting as a key connector between internal stakeholders, translating needs into accurate, efficient outcomes
- Giving clear, constructive feedback that helps colleagues refine their work, and logging issues for swift resolution
- Keeping our Jira project management boards accurate and up to date, so Client and Product Teams always have visibility on progress, blockers and next steps
- Collaborating to solve problems, improve task flows, and maintain clear documentation that keeps everyone aligned

Skills:

We are looking for candidates with the following skills:

Essential

- Strong attention to detail and accuracy in all work delivered
- Analytical and structured approach to problem solving
- Good communication skills, with the ability to work confidently across teams
- A proactive and collaborative mindset
- Ability to manage multiple tasks and programmes, prioritising effectively
- Comfortable working with data and learning new systems quickly
- Experience with Microsoft Excel and other Office tools
- Clear written communication, for documenting specifications and feedback
- Interest in agriculture, sustainability and data-led projects

Desirable

- Experience using Jira or similar project management tools (training will be provided for the right candidate)
- A background or experience within agriculture or agricultural supply chains
- Experience with form/survey-building tools, ideally within farm management systems or similar platforms

Package

We offer a competitive salary, with 25 days paid annual leave in addition to public holidays and enrolment onto the company workplace pension scheme.
